Letter of Recommendation for editing from Beijing University Neuroscience lab:

11/1/2021

Dr. Rong Zhang

Associate Professor

Neuroscience Research Institute, Peking University

This is a letter of recommendation for the editing work of Eric Sommer. I'm Dr Rong Zhang, from Neuroscience Research Institute, Peking University (PKU) in China. Over the past several years Eric has served as our primary English language editor for research-based scientific papers published in international science journals. As an editor he pays attention to all aspects of our papers, including the paper's purpose, structure and information sequence, scientific vocabulary and word choices, possible need for clarifications to remove ambiguity, and grammar. While editing a paper, he always maintains lines of communication with a paper's author(s) to allow for consultations when either he or the author(s) may have concerns about or wish to upgrade or alter elements in a paper. Following the initial round of editing a paper, Eric has continues to keep himself available for any additional necessary help up to the point of publication.

I have no hesitation in recommending him as an editor for scientific and technical papers.

If you have any questions, you can contact me at:
